DETAILED ACTION

1. This action is responsive to the amendment filed on February 22, 2005. Claims 1, 4, 7-14, 1617, and 20-27 have been amended. No new claims have been added. Claims 1-30 are allowed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Independent claims 1, 14, and 27 are an apparatus and method for obtaining audio information through the Internet upon a sign-on request from a remotely located terminal belonging to one of the agents of the automatic call distributor. The audio information is retrieved from a web file server by accessing a universal resource locator on another remotely located terminal of another agent of the automatic call distributor. The particular limitations of interest recite "transmitting a Sign-on request from a remotely located terminal of a first agent of the plurality of agents to a server of the automatic call distributor through the Internet notifying the server that the first agent is ready for receiving calls, retrieving a universal resource locator of a web file server containing the audio information needed by the first agent, said web tile server being located on a remotely located terminal of a second agent of the plurality of agents of the automatic call distributor, and downloading the audio information through the Internet from the web file server specified by the universal resource locator from the remotely located terminal of the second agent to the first remotely located terminal of the first agent."

3. The prior art of record fails to teach either singly or in combination the aforementioned claimed limitations. The invention in view of the aforementioned limitations overcomes the limitations posed by the prior art of record.
